Corres. to Int'l. Appln. No. PCT/GB00/04002

3. (Amended) A strip according to claim 1, of hollow tubular form.
4. (Amended) A strip according to claim 1, <sup>is</sup> attached to a longitudinally extending mounting part for mounting the strip adjacent a movable member to be compressed thereby to provide a sealing function.
5. (Amended) A strip according to claim 4, in which the mounting part is also made of thermoplastic elastomer material and the first covering extends thereover.
6. (Amended) A strip according to claim 5, in which the second covering extends over the first covering on the mounting part.
7. (Amended) A strip according to claim 1, in which the thermoplastic elastomer material and the two coverings are produced by extrusion.
8. (Amended) A strip according to claim 5, in which the thermoplastic elastomer material of the strip and of the mounting part is co-extruded and in which at least the first covering on the strip and on the mounting part is co-extruded.
9. (Amended) A method of making a sealing strip, comprising the steps of extruding thermoplastic elastomer material in foamed open-cell form, and extruding a first thin covering of closed-cell material onto at least a part of the outer surface of the
